FOREIGN MARKET STUDY

THE NETHERLANDS

JMT  
June 1971

Prepared by:

Foreign Market Development Section  
Research Branch  
Trade & Industry Division  
950 Yonge Street  
Toronto, Ontario

## F O R E W O R D

Export marketing research is a subject of considerable interest to our Department, to Ontario manufacturers and to businessmen who may be interested in exports. The Foreign Market Studies which are undertaken by our Section, are written for the use of our Trade and Industry Division, and specifically by our Marketing Branch and Trade Mission members. These studies depict the economic background of the countries that will be visited. For this reason our Foreign Market Studies are, in the first instance, working documents designed for the use of the Department and cannot be taken in their entirety as expressing the opinion or position of the Department of Trade and Development.

## INTRODUCTION

The Netherlands with a population of 13 million and an area of just less than 13,500 square miles is one of the most densely populated countries in the world.

Although the Netherlands lacks significant natural resources (with the exception now of natural gas) the Dutch have developed a modern industrial economy and exploited the advantages of a favourable geographical location. Today the Netherlands is Europe's foremost entrepot.

The Netherlands depends considerably on trade. By developing foreign trade and industrial specialization the Dutch have overcome the limitations of a relatively small domestic market and achieved a high standard of living. The G.N.P. per capita in 1969 was \$2,300. Netherlands exports in 1970 amounted to \$12.5 billion dollars and imports were valued at \$14.3 billion once again producing a deficit in the balance of trade.

The Netherlands has been very successful in attracting foreign capital and is still actively seeking foreign investment especially for the less developed North and South areas. The Netherlands is increasingly encouraging joint ventures rather than wholly owned subsidiary operations.

The market for Canadian products of all kinds appears to be good and expanding.

## GENERAL INFORMATION

### a. Geography and Climate

The Kingdom of the Netherlands consists of the Netherlands, and overseas parts of the kingdom: Surinam and the Netherlands Antilles. Each part enjoys full autonomy. They are united on a footing of equality for mutual protection and interest.

The Netherlands is located in North Western Europe and is bordered by Germany, Belgium and the North Sea. The Netherlands has a total area of less than 13,500 sq. miles. In addition to fronting on one of the world's busiest seas, the Netherlands is the terminus for three of the world's major rivers, the Rhine, the Meuse and the Scheldt, which provide easy access to the densely populated and highly industrialized nations of northwest Europe. The Netherlands has exploited this unique and highly advantageous geographic position and today Dutch ports have become the focal point for imports and exports of this region.

Physically the Netherlands is very low lying and flat. In fact, one-quarter of the country lies below sea-level and is protected against flooding from the sea by 1,500 miles of dunes and massive dykes. The lowland is threatened not only by the sea and rivers but also by the rainfall. Of the 30" of rain that falls on average in the Netherlands, not all is removed by evaporation, by the flora and fauna, or by man. As a result, the lower half of the Netherlands would soon be under water if it were not for pumping stations which continuously pump away the superfluous water.

The low part of the Netherlands consists of thousands of polders\* varying

Note: \* - a polder is a piece of land surrounded by dykes with an artificially controlled water-level.

in size, and it is here the majority of the population lives.

Land protection and reclamation has always been of immense concern to the Netherlands. At this time two major land reclamation projects are in progress.

One of the most important works on behalf of land reclamation is the partial draining of the Zuider Zee. This project has been going on for over 40 years and of the 4 new polders only the Markerwaard polder remains to be completely reclaimed. The fresh water lake that has been created is called the IJsselmeer. The original object was to use this reclaimed land for farming and cattle, but in view of the rapidly growing population much will be used for residences. The other main project is the Delta Project, scheduled to be completed in 1980, which comprises the building of enclosure dams in the estuaries between the islands in the south western part of the country excluding the sea entrances to the ports of Rotterdam and Antwerp.

Amsterdam with a population of 845,800 is the capital, financial centre and largest city in the Netherlands. Rotterdam (699,200) is the second city of the Netherlands and the largest seaport. The Hague (563,600) is the seat of the government and houses many government agencies, embassies and consulates. Other major cities include Utrecht (276,300) and Eindhoven (187,200).

The Netherlands has a temperate maritime climate. The sea exerts a considerable influence on the weather. In general the summers are cool and the winters mild. The mean January temperature at the Royal Netherlands Meteorological Institute is 35°F and the July temperature is 63°F.

b. Human Resources

The Netherlands with a population of 13 million inhabitants has one of the highest population density in the world - 970 people per square mile. The Netherlands has one of the fastest growing populations in Western Europe as a result of a combination of a very low death rate and one of the highest birth rates in Europe. By 1985 the population of the Netherlands is expected to be 15 million and by the year 2000 it is expected to reach 20 million. In thirty years the population density will be 1,500 per square mile. This figure is very high as an average but fairly large parts of the country could have densities 3 or 4 times this value - especially the provinces of South Holland, North Holland and Utrecht.

The population is concentrated in the South Western provinces which contain the major cities. 40% of the inhabitants live in towns of over 100,000, and a further 31% in towns of 20,000-100,000. In this densely populated area the towns and cities have developed into a ring known as the RINGSTAD of Holland. This ringtown runs from Amsterdam through Utrecht, Gouda, Rotterdam, The Hague back to Amsterdam. The ringtown already contains 4.6 million or 35% of the entire population. By 1980 there could be 5.5 million people living there.

The labor force totals about 4.6 million of whom 42% are employed in industry, 8% in agriculture and 50% in the service sector. Unemployment has remained low for years, and no easing of the labor market is expected in 1971. This chronic labor shortage has produced considerable net immigration into the Netherlands (some 33,000 in 1970). The foreign

workers in The Netherlands are chiefly Moroccans, Turks, Spaniards and Italians. In 1968, of the total 64,486 immigrants to the Netherlands, 1,924 were Canadians. In the same year 58,479 people emigrated from the Netherlands of which 3,608 came to Canada.

<u>Distribution and Projections</u> <u>of the Working Population</u>			
<u>Sector</u>	<u>1960</u>	<u>1970</u>	<u>1980</u>
	<u>%</u>	<u>%</u>	<u>%</u>
Agriculture	11	8	5
Industry	43	42	41
Services	46	50	54

Although in terms of employment, industry is at present 5 times more important to the Netherlands than agriculture and the service sector 6 times so, agriculture still accounts for an important part of the value of Dutch exports.

The Dutch labor force includes relatively few women and thus the female population constitutes a large reservoir of potential workers.

The Netherlands has a high level of education and a sound system of general, vocational and professional education. Recently there has been a marked increase in scientific education. School attendance is compulsory from the ages of 6 to 15.

The Netherlands has six universities. Leyden, Amsterdam, Utrecht, Groningen and Nijmegen are all university centres. There are also two technological institutes, an agricultural institute and two schools of economics. In 1970, there were approximately 90,000 students enrolled in universities compared to 60,000 in 1965.

The national language of the Netherlands is Dutch. However, many Dutchmen speak and understand English, French and German. About a quarter of a million people in the north-eastern part of the country habitually speak Frisian, a language more linguistically related to Danish.

About 40% of the population is Protestant and 40% Roman Catholics.

c. Constitution and Government

The Netherlands is a constitutional monarchy, the present head being Queen Juliana.

The executive power is held by the Prime Minister and his Cabinet. The Prime Minister is Dr. B. W. Biesheuvel.

In the Netherlands the legislature is called the 'Staten-Generaal' and is composed of two chambers. The 75 members of the First Chamber are elected by the provincial legislatures. The 150 members of the Second Chamber are elected by direct popular vote.

Because of the multiplicity of political groupings the Netherlands is inevitably ruled by a delicate coalition government. There are now 46 registered parties but under the proportional representation system only a handful can ever secure enough seats to participate in a government coalition. The need for a new party system has finally been recognized and all major parties have begun to consider mergers.

The municipalities which have a large degree of financial and administrative autonomy are governed by municipal councils elected by the direct popular vote.

## STRUCTURE OF THE ECONOMY

### a. Introduction

Before the Second World War trade and agriculture were the most important sectors in the Dutch economy. Her industrial production was closely allied to either trade or agriculture. Since then however, the industrial base of the Netherlands has greatly expanded and diversified and today industry is the source of 41% of the country's national production, 60% of its exports and provides 42% of its employment.

Agriculture in the Netherlands continues to decline in relative importance to the economy and now contributes only 7% to the G.D.P.

#### Origin of the G.D.P. by Sector

Agriculture	7%
Industry	41%
Services	52%

Despite a very high population density, the Netherlands has a surplus of agricultural produce which is made possible by land reclamation, intensive scientific cultivation and cooperative crop distribution. Seed bulbs, horticultural and dairy products still provide just over one-quarter of total Dutch exports.

Over 40% of the working population is in industry which because of the shortage of home produced raw materials is highly oriented towards the processing of imported raw materials. The output of the Netherlands industry includes steel, metals, transport equipment, chemicals, radios, textiles and ships. The main industrial growth has been in the metal and chemical industries. However, the automobile, paper and building

industries have also expanded.

The huge natural gas fields found under the province of Groningen are being exploited. Exploration is taking place under Dutch territorial waters for oil and natural gas. The economy relies heavily on imports, exports and the entrepot trades.

The Dutch have maintained a very satisfactory rate of growth over the past two decades expanding at an annual rate of 4.5% on average.

The Netherlands' membership in Benelux and the E.E.C. has encouraged Dutch industry to strengthen its competitiveness by placing a high premium on Research and Development, on mergers and on international cooperation. The result is an advanced industrial economy marked by diversified metal, chemical and electro-chemical industries.

The Dutch government is placing increasing emphasis on decentralization of industry. 40% of Dutch industry is located in the southwest of the country. The main industrial areas are Amsterdam (chemicals and steel), Rotterdam (shipbuilding and chemicals), Enschede (textiles), Eindhoven (electrical and electronic equipment and motor vehicles).

The Netherlands has welcomed foreign investment and the latter has played a major role in the development of the Dutch economy. The number of new foreign enterprises has increased steadily in the postwar period; thus there were 98 in the period 1946-52 and 936 by 1969. The foreign investment has come mainly from the U.S., the U.K. and West Germany.

b. Agriculture and Fishing

The importance of agriculture to gross domestic product has been declining steadily and in 1970 contributed only 7% as compared to 14% in 1950. However, agriculture's contribution to foreign trade continues to be an important sector of the economy and in 1970 agricultural products accounted for 26% of total Dutch exports. Total agricultural and horticultural exports in 1970 amounted to \$3.3 billion compared to \$2.8 billion in 1969. Exports from arable farming amounted to \$1.1 billion, livestock farming \$1.5 billion and horticulture \$0.7 billion.

There has been a considerable decline in farm employment in the last two decades despite which production and exports have shown a steady growth over the past fifteen years. Rural unemployment is still a problem in the Netherlands and the government is attempting to encourage industry into the rural regions. Farms are small, but intensive scientific cultivation, cooperative methods of distribution, factory processing and strict government control of quality have made Dutch dairy and horticultural exports highly competitive. Over the next few decades the average size of farms possibly will expand gradually and the total cultivated area will drop from 75% of the country's total area in 1966 to 65% in 1980 and 50% by 2000.

Dairying is the most important farming activity and in 1970 exports of dairy produce broke all records, increasing by \$133 million to \$502 million. The higher figure was due to a substantial increase in butter and cheese exports.

Milk production in 1970 rose to 8,239 thousand tons, butter to

122,000 tons and factory-produced cheese to 271,000 tons. Production of condensed milk remained at approximately 500,000 tons and dried milk production increased to 153,000 tons.

In 1970 the Dutch livestock comprised 4.1 million cattle, 5.7 million pigs, half a million sheep and some 46 million poultry.

Dutch farmers grow cereals, sugar beet, potatoes, flax, oilseeds, and caraways. The following table shows the production of the more important crops grown.

Production of the More Important  
Agricultural Crops, 1969 - 1970

	<u>1969</u> tons	<u>1970</u> tons
Wheat	677,000	643,000
Rye	207,000	172,000
Barley	389,000	334,000
Oats	322,000	200,000
Potatoes	4,704,000	4,961,000
Sugar Beet	5,002,000	4,739,000

Source: The Economist Intelligence Unit,  
Annual Supplement. Europa Year Book 1971.

Horticulture makes a valuable contribution to the Netherland's income and exports. Vegetable growing takes place in the west coast provinces of North and South Holland, and fruit farming in Gelderland and Limburg.

In 1970 exports of fresh vegetables, mainly tomatoes, cucumbers and lettuce increased 5.8% to 1,063,000 tons valued at \$284 million.

The Netherlands is also an important producer and exporter of flowers, plants and flower bulbs. Approximately 80% of bulbs grown are for export. 1970 exports of flower bulbs were valued at \$113.3 million while

exports of cut flowers amounted to \$101.5 million.

The main customer for the Netherlands agricultural products is West Germany.

The common agricultural policy of the EEC has had a very favourable effect on Dutch agriculture, because it was better organized, more efficient, more competitive and more export oriented than its European competition. However, Dutch agriculture is not without its problems. There is now increasing competition from other EEC producers. The Common Market is not as free as the Dutch would like. There is also the problem of over-production, particularly in dairy products, as a result of the high EEC price supports.

Fishing remains an important activity in the Netherlands. Although there was a drop in terms of total weight from 279,000 tons to 247,000 tons in 1970 the value went up from \$71 million to \$80 million. The E.E.C. countries take about 90% of total fish exports. The Netherlands also imports fish (some of which is reexported) mainly from the E.F.T.A. countries.

c. Mining

Coal, oil, clay, salt and natural gas are the Netherlands major natural resources.

Dutch coal-mining is highly mechanized, but the coal industry faces increasing competition from cheap foreign coal, petroleum and natural gas. Coal-mining production is being steadily reduced by the successive closing down of mines which have become uneconomic.

Coal-mining is expected to be phased out by 1975. With demand falling the new mine near Roermond was closed down before it came into operation.

In 1970, 4.3 million metric tons of coal were mined in the Netherlands compared to 5.6 million metric tons in 1969 and 6.7 million metric tons in 1968. State mines were the largest producers. Coal is still mined in southern Limburg, but this area is taking on a different industrial character with a number of new industries providing work for redundant miners.

Petroleum is produced in the province of Drente and South Holland. Oil exploration continues with moderate but worthwhile results, but domestic demand is growing more rapidly than output. Annual production is approximately 2 million tons. This supply is very small compared to the amount of oil that is imported and processed in the country. In 1969, imports of crude oil amounted to 48.4 million tons. Near Rotterdam five international oil companies have established one of the largest refining and petro-chemical centres in Europe. Total value of refinery products in the Netherlands in 1970 amounted to \$3 billion.

The discovery of large reserves of natural gas in Groningen province in the late 50's started a search for gas and oil in the North Sea. The Groningen gas field constitutes a natural economic resource of outstanding importance to the Netherlands. Sales of gas - in which the government has a share - are more than doubling each year and neighbouring countries such as Germany, Belgium and France are already buying large quantities. Reserves in the Groningen field are estimated at 1,900 billion cubic metres.

Enormous salt deposits have been discovered in the provinces of Overijssel and Groningen. Production is over 2 million tons annually and the Netherlands is the world's largest exporter of salt. Over 90% of production is high purity salt and about 75% is supplied to foreign and domestic chemical industries.

Large deposits of potassium and magnesium have been discovered in the province of Friesland, in the north. Royal Dutch Shell is currently looking into the feasibility of working these deposits, but it will be years before this discovery has a positive impact on the economy.

Production of Minerals and Power

	<u>1968</u>	<u>1969</u>	<u>1970</u>
Coal output (million metric tons)	6.7	5.6	4.3
Crude oil: output (million tons)	2.1	2.0	1.9
imports (million tons)	35.8	48.4	-
Natural gas (million cubic metres)	14,052	21,852	31.669
Electricity: gross output (billion Kwh)	33.6	37.1	40.8

Source: United Nations, Monthly Bulletin.

d. Industry

Since the Second World War the Netherlands has become a highly industrialized country instead of an agricultural based one. Tremendous growth has occurred in petroleum refining, petrochemicals and plastics, metallurgy, telecommunications equipment and computers.

The following table shows the increase in industrial production of certain sectors.

Industrial Production

(1963 = 100)

	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
Output by volume:				
All manufacturing	126	139	153	165
Metal products	123	132	148	-
Food, beverages and tobacco	119	123	128	135
Textiles, clothing and footwear	94	102	105	103
Chemicals & petroleum & coal products	168	207	244	273

Source: O.E.C.D.

The engineering and metallurgical industries employ the largest proportion of the working population - 39%, followed by the food, beverages and tobacco industry with 15%. The chemical and textile industries employ approximately 8% each.

Employment in Manufacturing Industry

	<u>'000</u>	<u>% of Total</u>
Building materials, glass & ceramics	48.2	4.4
Diamond processing	0.5	-
Printing	49.3	4.5
Chemicals	87.7	8.1
Lumber, cork & straw processing	46.5	4.3
Clothing	64.7	6.0
Laundries, dyeing & cleaning	13.0	1.2
Leather & rubber	35.0	3.2
Mining	34.0	3.1
Engineering & metallurgical	422.0	39.0
Paper	33.9	3.1
Textiles	89.9	8.3
Food, beverages & tobacco	<u>158.5</u>	<u>14.7</u>
TOTAL -	1,083.2	100.0

Source: The Economic Intelligence Unit - Annual Supplement 1970.

### Textiles

The textile industry in the Netherlands has been faced during the past few years with problems of revolutionary developments in basic materials and production methods as well as with competition from the E.E.C. countries. A number of structural problems are present in the Dutch textile industry, including the inadequate size of the enterprises and the relative lack of mechanization. The solutions include automation, rationalization and concentration and the textile industry is in the process of trying to carry out these solutions.

Cotton and wool required by the industry is almost all imported, but flax for linen is grown in the Netherlands and nearly all the raw materials needed for the synthetic fibre goods comes from the Dutch State Mines, producers of basic material for man-made fibres.

Employment in the textile industry is falling by about 2,000 a year and at the present the industry employs only about 8% of the working population.

### Chemicals

The Dutch chemical industry existed only on a minor scale before the Second World War and in 1938 sales of chemical products accounted for only 7% of total sales of Dutch industry. Today this ratio is 16% with an annual growth of production of 25%. The chemical industry is now the third largest industry in the Netherlands after the food and engineering industries. In 1970, about one half of chemical production was exported, making up 13% of total Dutch exports.

The high postwar growth rate in chemicals is a result of two factors: the

Netherlands' geographic position and the creation of the European Common Market. The modern chemical industry is a bulk industry handling very large volumes both of raw material and finished products. The Netherlands has the necessary fast, cheap transportation, with excellent port facilities, and is situated close to the industrial centres of Belgium, France, and Germany. With the advent of the EEC, industries establishing themselves in the Netherlands could count on a vast 'domestic' open market protected by a common external tariff.

Value of Dutch Chemical Production

	<u>\$ million</u>
1950	345
1960	885
1968	2,210
1969	2,537

Considering the high level of recent investment in the chemical industry, production should continue to increase.

Because of automation the contribution of the chemical industry to employment is relatively small. The entire chemical industry in the Netherlands employs only about 8% of the working population.

The Dutch chemical industry is located mainly between Rotterdam and the North Sea. Near Rotterdam one of the largest petrochemical centres in the world has been established. The Dutch State Mines is continually enlarging its plants and produces large quantities of fertilizers and basic materials for plastic industries.

Metal and Engineering Industries

The metal and engineering industries are the largest sector of Dutch industry.

Sales and exports of the Dutch steel industry should continue to expand with the continuing extension of capacity. The integrated steel works of Hoogovens at IJmuiden account for nearly the whole of Dutch steel production which amounted to 4.7 million crude tons in 1969, and 5 million tons in 1970. Aluminum works started production at Delfzijl in 1966 and in 1969 output was 72,000 tons. Production in the nonferrous sector should rise significantly in the future, partly as a result of the decision to establish a new aluminum smelter and an electro-zincing plant.

Large shipyards are located at Rotterdam, Amsterdam and Flushing. Coasters are built especially in Groningen. The subsidies scheme for the Dutch shipbuilding industry will continue to bolster this sector.

Engines and machinery are built in Amsterdam, Rotterdam, Heneelgo and Haarlem.

The motor industry consists of the Dat works in Eindhoven and the assembly operations of various foreign manufacturers in Amsterdam and Zwolle.

The Dutch aircraft industry consists of the Fokker works situated at Schiphol.

The major name in the electrical engineering sector is Phillips. It manufactures a huge range of products from light bulbs to computers. The firm is based in Eindhoven.

#### Brewing Industry

The Netherlands is one of the major exporters of beer in the world. Two major companies dominate the Netherlands market with 80% of production.

In all there are 20 companies which own 30 breweries and employ 7,000.

Raw materials for this industry are almost wholly home-produced.

Light industries are well developed in the Netherlands. Food processing, particularly milk, meat and cocoa, is a Dutch specialty and production of paper, shoes and furniture is considerable.

Many traditional crafts are also important to exports: diamond cutting in Amsterdam, pottery in Delft and the special skill of Dutch engineering in harbour and water control works.

The following table shows output of selected items of the Netherlands industry:

Output of Selected Items  
( '000 tons unless otherwise stated)

	<u>1965</u>	<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>
Pig iron	2,364	2,209	2,588	2,821	3,461

e. Energy

The Netherlands currently imports 60% of its fuel needs. Natural gas consumption now accounts for 25% of total energy demand in the Netherlands, but is expected to provide 40% of the Netherland's energy by 1975. This

gives some idea of the economic importance of the Groningen field to the Netherlands. Exports of natural gas to West Germany, Belgium and France could reach a total of 30,000 million cubic metres or more by 1975. In order to meet this expected expansion Gasunie, the national distribution company, is embarked upon a programme to increase capacity of existing pipelines.

A tightly controlled and lucrative policy towards energy production and marketing has been evolved. Natural gas sales in the Netherlands totaled 31.0 million cubic metres in 1970, of which 11 million cubic metres were exported. Total natural gas sales were valued at \$442 million. The Dutch Government and the two oil companies involved in the operation of the field have taken advantage of the monopoly position conferred by the proximity of the gas field to the major industrial centres of Europe. They have adopted a high price for the gas and a deliberately slow rate of depletion of the reservoir. This monopoly position is now being challenged, however, by other potential suppliers of gas such as the North Sea producers and the Soviet Union.

The availability of gas has ensured the demise of the nation's coal industry and production of coal is already 50% below the pre-gas level. However, the oil industry has not suffered an overall reduction in its energy markets.

The Dutch power program envisages the construction of 15 power stations over the next decade, 2 of which will be nuclear.

f. Transportation and Communications

The Netherlands transportation network provides ready access to all areas within the Netherlands as well as excellent connections with the rest of Western Europe. The Netherlands with its favourable geographic location, modern harbour facilities and efficient waterways, air and roadway systems has become one of the leading distribution centres in the world.

Rotterdam is one of the world's largest ports and the most important transshipment points for goods flowing into or out of Europe. The majority are bulk goods, especially petroleum, ores, coal, cereals and fertilizers, but Rotterdam also handles more general cargo than any other port in Europe. In 1970 Rotterdam handled 215 million tons of cargo, more sea-going freight than any other city in the world. The Netherlands has no free ports as such, but its custom facilities have developed to permit minimum formalities in storing and transshipping merchandise.

Ocean shipping plays an important role in transportation and the Merchant Fleet is an important earner of foreign exchange as well as a major customer for domestic shipbuilding. In 1970 the Dutch merchant fleet consisted of 1,088 ships totaling 4.1 million gross registered tons.

Goods move rapidly from the Dutch ports to the European hinterland via a highly developed system of railways, highways, inland waterways and pipelines.

Dutch road transport systems play an important role in the overall transportation picture of Western Europe. A large proportion of all goods transported within the E.E.C. are carried on Dutch trucks, and a

major amount of the Netherlands domestic goods are transported by road. However, recent West German restrictions on the number of trucks on German roads, and the German transportation tax have sharply slowed the growth in the Netherlands trucking industry. The Netherlands has approximately 300,000 commercial vehicles and over 2.25 million automobiles. A program is underway for doubling the national highway system to more than 1,200 miles in the next five years.

A well developed inland-waterways in the Netherlands is of great importance, both for transport of domestic and imported goods and the transit trade. A large share of the transport by international inland shipping in Western Europe is by Dutch vessels. The Dutch fleet comprised in 1970, 20,334 vessels of 6.6 million tons load capacity. In 1969, the Netherlands' inland waterways handled 199 million tons of traffic.

The railways in the Netherlands are run by the one company, the state owned "N.V. Nederlandsche Spoorwegen". The railways carried 184 million passengers and 25.5 million tons of goods in 1969.

The Royal Dutch Airline (K.L.M.) was founded in 1919. Air traffic is concentrated on the national airport, Schiphol, near Amsterdam. Present capacity of terminal facilities at Schiphol is 8 million passengers and 300,000 tons of cargo annually and this can be increased to 25 million passengers and 2 million tons of cargo. In 1970 passenger traffic increased by 19% to 5.2 million. Freight traffic (goods and mail) increased 11% to 183 million tons. The fact that air traffic percentage increases at Schiphol are higher than the average increase in world air traffic, could be regarded as an indication that Schiphol is still

annually strengthening its position as the gateway to Europe.

g. Tourism

The Dutch travellers going abroad spend a great deal more than foreign tourists in Holland. Since 1963 the tourist balance of payments has shown an ever increasing deficit which exceeded to \$200 million in 1969.

One cause for the relative decrease in tourist income is price increases, which are the result of the introduction of the value added tax and the raising of other taxes.

In 1969, 2 million tourists visited the Netherlands. The majority of visitors to the Netherlands come from West Germany, the U.S., Britain, France, Australia and Canada. In 1969, there were 51,015 tourists from Canada, about 5,000 more than the previous year.

Amsterdam is among the important international tourist cities in Europe. There are about two million visitors each year.

## FOREIGN TRADE

### a. General

In 1970 the Netherlands exports increased 18% from \$10.6 billion in 1969 to \$12.5 billion. Netherlands imports increased 23% from \$11.7 billion in 1969 to \$14.3 billion in 1970. Once again there resulted an unfavourable balance of trade for the Netherlands, with the export-import ratio slightly less favorable than the previous year. The export-import ratio in 1950 was 69%, in 1960 it was 89% and in 1969, 91%. In 1970 this ratio was 87%.

The following table shows the trend of foreign trade in the Netherlands, 1965-1970.

	<u>1965</u>	<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
	-----\$ Million-----					
Exports	6,827	7,210	7,782	8,908	10,641	12,565
Imports	7,970	8,562	8,903	9,923	11,740	14,302
	-----	-----	-----	-----	-----	-----
Balance	-1,143	-1,352	-1,121	-1,015	-1,099	-1,737

The pattern of Dutch exports showed a remarkable shift after the Second World War. With the loss of the Indonesian market and given the industrial development of the Netherlands the swing was inevitable. The trend towards trade concentration in the E.E.C. continues and presently about 62% of Dutch exports are directed to E.E.C. countries and imports from the E.E.C. countries amount to 58% of total Dutch imports, increases of 22% and 19% respectively. This situation contrasts strongly with the situation a decade ago when the E.E.C. accounted for 42% of both the Netherlands' exports and her imports.

West Germany is the Netherlands largest single trading partner replacing Belgium and Luxembourg. West Germany in 1970 took 33% of the Netherlands exports and accounted for 27% of the Netherlands imports. France and the U.K. are also important trading partners, as is the U.S. In 1970, Canada took 0.6% of the Netherlands exports and accounted for 2% of her imports.

As the Netherlands trade with E.E.C. members has grown, the relative importance of her trade with the U.S. and E.F.T.A. has declined. E.F.T.A.'s share of Dutch exports is now 16% and of imports 11%. The U.S. share is 4% of exports and 10% of imports.

The Netherlands Main Trading Partners  
(% of total value)

	<u>1965</u>	<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
<u>Exports to:</u>						
West Germany	27.8	26.9	26.1	27.8	29.7	32.6
Belgium/Luxembourg	14.9	15.1	14.7	14.3	13.9	13.9
U.K.	8.7	8.2	8.8	8.5	7.6	6.9
France	8.4	8.9	9.2	10.5	11.6	9.9
Italy	4.6	4.6	4.9	4.8	4.9	5.4
U.S.A.	3.8	4.6	4.7	5.2	4.5	4.3
Sweden	3.3	3.1	2.9	2.8	2.5	2.4

Imports from:

West Germany	23.7	24.8	25.4	26.4	26.7	27.1
Belgium/Luxembourg	19.6	19.0	18.4	18.0	17.7	16.8
U.S.A.	10.3	11.4	10.6	10.9	9.7	9.7
U.K.	6.5	6.1	5.5	5.5	5.7	5.7
France	6.1	6.0	6.4	6.5	7.8	9.9
Italy	4.0	4.2	4.3	4.5	4.5	4.3
Sweden	2.7	2.6	2.3	2.3	2.3	2.2

There has also been a change in the composition of Dutch trade. Food and other agricultural exports are still of sizeable though declining importance.

In the past fifteen years agricultural exports have declined from 30% to 26% of the Dutch total. Manufactured products which accounted for 47% of total exports in 1951 and 57% in 1960 now account for 60%.

The imports of the Netherlands are strongly related to her exports. A considerable proportion of the Netherlands' agricultural imports are incorporated in articles later exported. Thus grains and cereals feed Dutch livestock, and coffee and cocoa are raw materials for the Dutch food processing industry. Imports of crude petroleum, too, have soared as exports of refined products have expanded in the wake of Rotterdam's emergence as a major petroleum port and refining centre.

b. Netherlands Imports

In 1970, the Netherlands imported goods to the value of \$14.3 billion, an increase of 23% from the previous year. The Netherlands' imports have risen steadily during the past five years and between 1965 and 1970 showed an increase of 79%. All major sectors enjoyed growth, especially the chemical and primary manufactured goods sectors. These increased 39% and 37% respectively. Machinery and transport equipment imports increased by about one-third. These three categories account for nearly 60% of total imports. Agricultural imports account for about 13%, and raw materials 9%.

Among specific products which are important imports to the Netherlands are petroleum and petroleum products, chemicals, nonelectric machinery and electric machinery.

Principal Imports of the Netherlands 1970

<u>Commodities</u>	<u>\$ million</u>
Cereals and products	432
Petroleum products	1,421
Chemical products	1,119
Nonelectric machinery	1,399
Electrical machinery, apparatus & appliances	1,109
Transport equipment	1,132
Iron and steel	748
Clothing	495

c. Netherlands Exports

In 1970, the Netherlands exported goods worth \$12.5 billion, an increase of 18% from the previous year. During the past 5 years the Netherlands' exports have increased 84%, showing gains each year, but particularly in 1969 and 1970. Key growth areas were exports of chemicals, which nearly doubled, and all the manufacturing categories. In terms of specific categories, the largest single export from the Netherlands is chemicals, which accounts for 13% of total exports, agricultural products account for 26% and manufactured goods 60%.

Other major exports include electrical machinery, petroleum products, nonelectric machinery and textiles and yarns.

Principal Exports of the Netherlands 1970

<u>Commodities</u>	<u>\$ million</u>
Meat and products	774
Dairy products	568
Fruit and vegetables	538
Chemicals	1,620
Textiles, yarns and cloth	748
Iron and steel	513
Nonelectric machinery	862
Electric machinery	1,038
Transport equipment	563
Petroleum products	1,056

CANADIAN TRADE WITH THE NETHERLANDS

a. General

During the past decade the balance of trade between Canada and the Netherlands has been in Canada's favour.

The following table shows trade between the two countries for the past five years.

<u>Canadian Trade with the Netherlands 1966-1970</u> (\$ million)					
	<u>1966</u>	<u>1967</u>	<u>1968</u>	<u>1969</u>	<u>1970</u>
Exports	143	176	178	185	277
% change from previous year	+12	+16	+ 1	+ 4	+50
Imports	60	65	69	79	79
% change from previous year	+ 7	+ 8	+ 6	+14	-

During the first five months of 1971 Canada's exports to the Netherlands amounted to \$87.3 million compared to \$97.6 million for the same period in 1970. Canada's imports from the Netherlands during the first five months of 1971 amounted to \$25.5 million compared to \$33.5 million for this period in 1970.

In 1970, Canada exported \$277 million worth of goods to the Netherlands, a very substantial 50% increase from \$185 million in 1969.

This larger amount may be accounted for in part by an increase of over \$30 million in airplane exports, part of a \$130 million Dutch order for Canadairs Northrop F5 fighters; and by substantial increases in exports of iron ore, zinc in ores and concentrates, and rapeseed.

Selected Canadian Exports to the Netherlands, 1969-1970  
(\$ million)

	<u>1969</u>	<u>1970</u>	<u>% of</u> <u>1970</u>
	-----\$ million-----		
Durum wheat	5.7	7.3	2.6
Wheat	24.0	22.1	7.9
Flaxseed	10.7	12.6	4.5
Rapeseed	2.5	11.8	4.2
Iron ore	23.0	35.7	12.8
Zinc in ores & concentrates	.7	12.6	4.5
Molybdenum	6.4	9.7	3.5
Asbestos	4.3	4.6	1.6
Aluminum pig, ingots, castings, etc.	5.3	3.8	1.4
Wood pulp	18.0	21.0	7.5
Aircraft	7.5	39.2	14.1
Aircraft engines, parts & assemblies	<u>7.4</u>	<u>10.2</u>	<u>3.6</u>
Total Exports -	185.0	277.0	100.0

From the above table we see that the major Canadian exports to the Netherlands consists of wheat, metal ores and wood pulp. The only major manufactured exports consist of aircraft and aircraft engines and assemblies.

Ontario Exports to the Netherlands in 1970 amounted to \$39.9 million and accounted for 14% of total Canadian in 1970. Principal Ontario exports include oil seeds and plastics and synthetic rubber.

The breakdown of exports by categories was as follows: live animals (\$6,100), food, feed, beverages and tobacco (\$2,423,200), crude materials inedible (\$16,801,000), fabricated materials inedible (\$9,082,000), end products inedible (\$11,469,100), and special transactions and trade (\$78,300).

Selected Ontario Domestic Exports to the Netherlands, 1969 - 1970

	<u>\$ million</u>	
	<u>1969</u>	<u>1970</u>
Cereals unmilled	.3	1.2
Rawhides and skins	1.9	.7
Oil seeds, nuts and kernels	4.4	2.3
Plastics and synthetic rubber	2.7	4.0
Industrial chemicals and explosives	1.9	1.3
Aircraft	.9	3.3
Measuring laboratory, etc. equipment	.9	1.5
Zinc in ores, concentrates and scrap	<u>.5</u>	<u>12.6</u>
Total Domestic Exports to the Netherlands-	23.6	39.9

In 1970, Canada imported products worth \$78.9 million from the Netherlands, a negligible difference from \$78.6 million the previous year. It is however a 14% increase over the \$69 million in 1968.

Manufactured goods such as electronic equipment, electrical machinery, aircraft assemblies and parts, and office machinery are important Dutch exports to Canada.

Nevertheless, the value of agricultural and horticultural products that the Netherlands exports to Canada is quite significant. Among the major items are cheese, chocolate, cocoa and cocoa butter, cigars and tobacco, and vegetable oils.

The continued growth and modernization of the Netherlands economy should keep the Netherlands as one of Canada's important trading partners.

<u>Selected Canadian Imports from the Netherlands, 1968-1970</u> (\$ million)				% of <u>Total</u> <u>1970</u>
	<u>1968</u>	<u>1969</u>	<u>1970</u>	
Cocoa, chocolate, cocoa butter	3.4	3.3	5.7	7.2
Cheese	1.7	2.0	2.7	3.4
Tobacco and cigars	2.0	2.3	2.1	2.6
Vegetable oils	3.4	2.7	2.1	2.6
Aircraft assemblies, equipment & parts	.9	4.1	5.0	6.3
Electronic equipment	12.3	12.7	10.0	12.6
Office machinery	1.1	3.8	2.9	3.6
Electric shavers and parts	1.6	1.5	-	-
Electrical equipment, appliances & parts, n.e.s.	-	-	1.9	2.4
X-ray and related equipment & parts	<u>1.2</u>	<u>1.2</u>	<u>1.6</u>	<u>2.0</u>
Total Imports -	69.0	79.0	79.0	100.0

Other significant imports from the Netherlands include X-ray equipment, chemicals, and measuring and controlling equipment.

b. Opportunities for Canadian Exporters

In exporting to the Netherlands, Canada faces stiff European and domestic competition as well as tariff and transportation advantages. The Dutch are accustomed to high standards of supply and service and marketing channels differ somewhat from ours. It is difficult to attempt to penetrate this market by direct sales to the ultimate consumer. There are, however, many qualified firms of agents and distributors to take on the task of promoting products.

Among the products which stand a good chance of being well received on the Dutch market are the following:

1. Advanced cargo handling equipment, deck gear and advanced navigation equipment.
2. Industrial process controls, laboratory and testing equipment, and scientific, technical and industrial equipment.
3. Anti-pollution equipment, especially those for air and water pollution.
4. Food servicing equipment.
5. Office machines, equipment and supplies.
6. Printing and bookbinding equipment.
7. Advanced educational materials and training aids.
8. Automotive parts and automated repair and maintenance equipment for vehicles.

Trade fairs play an important role in exposing products to the market and are an efficient and quick way to compare prices and qualities of competitive products. For overseas participants it presents the opportunity to meet agents and distributors.

Many trade fairs take place each year in the Netherlands and both Utrecht and Amsterdam have extensive and well organized exhibition centres.

## INVESTMENT AND TRADE POLICY

### a. Trade Policy

The Netherlands has long been an advocate of the widest and most liberal possible trade with the rest of the world. This attitude has been necessitated by the fact that her economy is dependent on foreign countries both for its raw materials and its markets. Almost all imports from all countries are free from quota restrictions, though import licences are needed for goods from Hong Kong, Japan and the Communist bloc, as well as for certain agricultural products.

The Netherlands is an advocate of international cooperation. She has formed an economic union with Belgium and Luxembourg, which has greatly stimulated trade between the three countries. More importantly, the Netherlands is a member of the European Common Market. She is also a member of the E.S.C., Euratom, the O.E.C.D. and is a contracting party to GATT. The Netherlands is also a member of the International Monetary Fund, IBRD, International Finance Corporation, International Development Corporation, and the European Monetary Agreement.

### b. Agency Agreements

The principal-agent relationship in the Netherlands is governed by the laws of 1936 and 1965. The law provides minimum terms for serving notice of termination which applies in the absence of termination provisions in the agreement.

A definite term agreement terminates on the expiration of the agreement. However, if the parties continue to operate under the agreement after expiration date, it is deemed extended for a further identical period.

Termination of an agreement without adequate notice makes the principal liable for compensation. In exceptional circumstances and for just and urgent causes, the agreement may be terminated without notice provided the other party is notified immediately of the causes.

Under the 1965 Law, if an agent is dependent on no more than two suppliers the Labour Office must approve the termination of the agreement.

c. Patents

The present basic law concerning patents was put into effect in 1964.

The term of patent protection is 20 years from the application's effective filing date, or 10 years from date of patent grant, whichever is longer.

A "Patent of Addition" expires at the same time as the basic patent.

The application for patents and various stages of processing required before the patent is granted must be made within 7 years.

Compulsory licensing may be given three years after the patent is granted if the patent is not worked or not worked sufficiently.

Information on step-by-step procedures regarding patents, trademarks and copyrights protection in the Netherlands should be obtained from competent legal counsel.

d. Trademarks

In January 1971, the Benelux Convention of Trademarks and the Benelux Trademarks Act entered into force and supersedes the Netherlands Trademark Law. Exclusive rights to a Benelux Trademark will only be obtainable by registration; prior user rights will not be recognized.

Trademark applications meeting the Acts formal requirements will be allowed. A registered Benelux mark must be used during first 3 years after registration and during an uninterrupted period of 5 years; otherwise it will be considered to have lapsed. Benelux registrations are valid for 10 years, renewable for similar periods. Existing registrations in the Netherlands (and other Benelux countries) will have to be reapplied for before December 31, 1971.

e. Foreign Investment

The Netherlands traditionally has been liberal towards foreign investment in general and does not apply any discriminatory provisions to the establishment of foreign enterprises. Foreign establishments have the same rights and obligations as other Dutch enterprises. In fact, foreign investors may take advantage of the extensive program of financial assistance the government extends to firms establishing in "development areas".

The government does not play a strong regulatory role in the economy although it does participate to some degree in a few sectors such as mining, transportation and communications.

The establishment of a foreign firm or foreign participation in an existing Dutch enterprise requires an exchange license from the Netherlands Bank. This is usually granted automatically. This gives the holder full rights to transfer profits and repatriate capital. The government does not refuse licenses to foreign industries merely because similar enterprises are already established in sufficient numbers within the country.

The most frequent type of business organization in the Netherlands is either the private firm or partnership for smaller enterprises and the corporation or "Naamloze Vennootschap" (N.V.) for larger enterprises. Foreign firms usually find the N.V. best adapted to their use.

Every business enterprise must become a member of the local Chamber of Commerce. All business organizations are required by law to keep books and prepare yearly balance sheets. Records must be kept for at least 10 years.

In 1970, there were 936 foreign industrial establishments completed or planned in the Netherlands of which 608 were subsidiaries and 328 joint-ventures with Dutch concerns. Of the total foreign investment over one-third came from the U.S., nearly one-fifth from the U.K. and over one-sixth from West Germany. Sweden, Belgium and Switzerland also are important investors in the Netherlands. Most of this foreign investment takes place in the metalworking and chemical sectors.

#### Tax and Tariffs

Canada has a tax agreement with the Netherlands as of April 2, 1957, with a supplementary Convention in 1959.

#### Tariffs

The Netherlands has been traditionally a low-tariff country, but its duty structure has been adapted to the higher common outer tariff of the E.E.C. for non-E.E.C. imports. There is no tariff protection for any industry.

Import licenses are no longer required for the majority of imports from most countries. Quotas exist for only a few industrial products.

TABLE I

Exports of the Netherlands 1969-1970
